FRONT-END DEVELOPER

Resume

- I'm a **Front-End** developer with extensive experience in creating dynamic, high-performance user interfaces. I have solid knowledge of **HTML**, **CSS**, **Javascript**, **typescript** and frameworks such as **Vue.js** and **React.js**, as well as experience with **Node.js** for back-end integration.
- My expertise includes using tools such as **Pinia**, **Nuxt.js**, **Tailwind CSS**, **Bootstrap**, **SASS**, and **LESS** to create responsive designs and optimize application performance. I'm also proficient in testing libraries and frameworks such as **Jest**, **Cypress** and **React Testing Library**, ensuring code quality.
- With practical experience in **Agile Methodologies (Scrum)**, I am able to understand the client's needs and deliver efficient, high-quality solutions within the established deadlines.
- Experience in developing e-commerce projects and management systems integrated with **RESTful APIs**.

Education

- Degree in Architecture and Urban Planning - IESB, 2018.

Idiomas

- English - Advanced.
- Portuguese - Native.
- Spanish - Advanced.
- French - Beginner.

Experiences

Nov/23 a Apr/24 Medware

Web Developer

- I have developed front-end solutions for medical systems using **Nuxt.js**, **Vue.js** and **Typescript**.
- I performed maintenance, refactoring and integration with **RESTful APIs** in legacy systems.
- I implemented **unit tests**, **E2E** and searched for technologies to improve application performance.
- I created an extension to the main application - XML Report Generator, where I also used **Pinia**, **Chartjs**, **Tabulator** and **Codemirror**.

Sep/24 a Oct/24 Freelancer

Front-End Developer

- I worked on updating the medical website with the intention of repositioning its presence online and in the market.
- I developed front-end solutions for the site using **Wordpress**.

- A pre-project was developed, using **Figma**, and a presentation was given to the client so that they could see the site before it was built, as well as all the elements to be changed and implemented.

Architect & Public Relations (*Career transition*)

- Architecture and project management (2016-2018).
- Organization of events, lectures and financial sector in a medical clinic (2018-2022).

Certifications

- Front-End Engineering - EBAC, 2023.

Relevant Projects

Gynecology Website - [WebSite](#)

- I developed a website for a gynecologist in Brasília with the aim of repositioning her online presence and attracting new private patients.
- The new site was designed to communicate the advantages of this change and explain to potential patients the benefits of the more personalized and specialized care that private practice offers.
- Stacks used: **Wordpress, Figma**.

New Portfolio - [WebSite](#) | [Repository](#)

- My new portfolio, with the aim of showing my work and describing who I am in an objective way.
- Stacks used: **Vue, Typescript, Nuxt, i18n**.

EasyPlay - [WebSite](#) | [Repository](#)

- Project developed with the aim of learning and training React concepts during the front end course.
- It aims to sell games in digital format for computers and video games, something very similar to Steam.
- Stacks used: **React, Typescript, Jest, Redux, React-router-dom, Styled-components, Yup, React-hooks**.

Efood - [WebSite](#) | [Repository](#)

- Project developed with the aim of learning and practicing React concepts during the front end course.
- It's a proposal similar to Ifood with the aim of choosing the restaurant, the meal and placing the order for delivery.
- Stacks used: **React, Typescript, Jest, Redux, React-router-dom, Styled-components, Yup, React-hooks**.

Skills

- **Frontend:** React.js, Vue.js, Tailwind, Bootstrap, SASS, LESS
- **Tools:** Git/GitHub, Cypress, Jest, Redux.
- **Methodologies:** Scrum, Design Responsivo, Testes Unitários.
- **Others:** API Integration, Design System, Figma.

Differentials

- Experience in **refactoring code** and developing scalable solutions.
- Vision of design combined with functionality, ensuring usability and aesthetics
